

Safety Valve Hoses

Refrigerant Charging Hoses 150cm
(5ft) Standard 1/4" Fitting

Refrigerant charging and reclaim hoses 150cm, suitable for most refrigerants.

Revolutionary Safety Valve technology which allows you to screw/attach the fitting on the system prior to starting the refrigerant flow. This avoids any refrigerant loss and any risk of getting refrigerant burn. After attachment, simply turn the knob to start or to stop the flow.

The safety hose swivel sleeve allows free 360° rotational movement of the hose, without the fitting coming loose or being put under unnecessary strain. This prevents unwanted leaks.

Colour-coded hoses and valves - 3 valves and 3 hoses

Compatible with CFC, HCFC, HFC refrigerants and blends

Leak-proof 8-sided crimps

Blow off grooves preventing spray back

Adjustable valve core depressor

Extra deep knurling on nuts for easy grip

Nylon permeation barrier (Meets SAE J2196)

Product name	Safety Valve Hose
Part number	EVHA1680
Working pressure (psi)	800
Burst pressure (psi)	4000
Usage	Refrigerant charging/recovery hoses
